Experience

Ifood institucional.ifood.com.br — Jan 2022 to Present

Software Engineer Remote

- Member of the iFood payout team;
- Built external conciliation microservices to improve data confidence to over 99%;
- Developed an event saga service which was responsible for handling a significant volume of messages, with more than 20 million messages processed daily.
- Refactored Kafka consumers from legacy services to create a new pattern of consumers for new services;
- I created a study group, where I helped several other developers with Kotlin.

Dextra dextra.com.br — Jan 2021 to Jan 2022

Software Engineer Remote

- Third party member of banco PAN for 3 months, after changed to IFood team for 9 months;
- Member of integrations team at iFood payout;
- I was responsible for creating a Kotlin code style that was the reference for all members of payout teams;
- Developed several scripts that helped to validate information with clients. It made the communicating with them a lot easier.

Aurum Software aurum.com.br — May 2019 to Jan 2021

Full-Stack Developer Floranópolis, Brazil

I was working at Astrea, a scalable and reliable Software-as-a-Service platform for lawyers, I was responsible for developing new features, maintaining a consistent user interface, improving legacy code, fixing bugs, and writing tests.

My skill set includes Java, Kotlin, and Javascript, as well as experience with technologies such as Spring Boot, Ktor, Koin, Guice, Node, Jersey, Appengine, AngularJS, React, Redux, and testing tools like JUnit, Mockito, Jest, and Testing-library.

PariPassu Aplicativos paripassu.com.br — Feb 2017 to May 2019

Software Engineer Florianópolis, Brazil

I was responsible for developing an Angular/Java platform for data visualization, monitoring, and analysis.

Skills: Java · Spring Boot · AngularJs · PostgreSQL · Scrum · JUnit · Git · TypeScript
